Contact list plays an important role in our social life - it helps you quickly and conveniently get in touch with your family, friends, business partners, etc. However, there are always unexpected storms for the data in the phone so more and more people want to know how to transfer contacts from Android to computer for backup. To help you out, this tutorial will show you some ideal solutions to export contacts from Android to PC easily. It's also helpful for you to learn: Now let's see what these solutions are and how to perform them. Using a professional Android contacts transfer tool can help you complete the transferring process more effortlessly. Here MobiKin Assistant for Android or MobiKin Assistant for Android (Mac Version) is what you need. With the help of this software, you can export your contacts information from Android to PC only in a few seconds by several clicks. It allows you to transfer one or several contact files from Android to computer easily. In addition, this software supports overall brands of Android smart phone, including Samsung, Xiaomi, Huawei, LG, Motorola, HTC and many more, so there is no need to worry about the compatibility. See, Lifehack also thinks highly of this Android contacts transfer software: Now, just don't hesitate to download the powerful program on your computer and go with the steps below to easily save your Android contacts: Step 1. Install the downloaded software and launch it. Then connect your Android phone to the computer and the program will detect it automatically. Step 2. Click the "Contacts" > "All Contacts" button from the left panel to preview and select the contacts you want to transfer. Step 4. Hit the "Export" button and select a backup format, such as CSV, HTML, VCF, Outlook XML, etc. Then the selected contacts will be exported to PC in no time. Here is a video tutorial for exporting contacts from Android to PC: How to Backup Android Contacts to PC with One Click? The contacts transfer tool for Android introduced above - MobiKin Assistant for Android also enables you to transfer the whole contacts folder on Android to PC. This is because it also equips the "One-click Backup & Restore" function that allows users to make a contacts backup with one click. If you wish to backup all your Android contacts to PC, you can choose this convenient way. The steps are as below: Step 1. Download, install and run the Android contacts backup tool on your computer. Step 2. Link your Android phone to computer and follow the prompts to let the program detect your mobile phone. Step 3. Tap on "Super Toolkit" on the primary interface and select "Backup" option on the next interface. Step 4. Tick off the "Contacts" category when the "Back up" window pops up and then hit the "Back Up" button at the bottom to copy your contacts to PC. Syncing contacts to computer is one of the best ways to backup Android contacts. But sometimes you may not have a computer at hand and need to backup your Android contacts to other devices or location. In this case, you can turn to the page "How to Backup Android Contacts" from which you can learn 5 ways to backup your Android contacts. Speaking of Android contacts backup, most users would think of Google/Gmail. That's because Google equips the "Sync" function that allows people to backup and restore contacts saved on mobile phone easily. By using this way, you just need to sign in your Google account on Android and then you can backup your Android contacts to Google or import contacts from Gmail to Android freely. If you don't have a Google account, you can select to copy your contacts from Android to Outlook and then download them to computer as well. Here are the details and you can follow them to have a try. Step 1. Go to "Settings" > "Accounts" on your Android phone and find the "Google" option under the "Accounts" section. Then login with your Gmail account and enable the sync "Contacts" option. Step 2. Turn on your computer and sign in your Google account. Then you can navigate to "Contacts" in your account, and tap on "More" > "Export". Step 3. After that, you'll see an interface like below. Just choose the contacts you wish to export and decide the export format as you like. Next, you can click "Export" button to save your contacts from Android to PC. How to Copy Contacts from Android to PC without Software? There is an original and simple way to move the Android contacts - transfer contacts from Android to PC with USB only. By using this way, you can make use of the inbuilt "Contacts" feature on your phone. This feature enables users to import/export contacts from Android to USB storage. With it, you can move the wanted contacts to USB storage first and then copy them to PC. Here is how: Step 1. Enter the "Contacts" App on your mobile phone and click the "... " or "More" icon to open the menu. Step 2. Choose the option "Import/Export"> "Export to USB storage" from the menu to save your contacts as a .vCard file. Step 3. Use a USB cable to connect your Android phone to computer. When the mobile phone is recognized, you can simply drag and drop the vCard file to PC. It might take you several minutes finding the vCard files. Which Contact Transfer Method is Better? We have mentioned 4 contact transfer methods above, then which one is better? To help you choose the proper method more easily, we would like to make a comparison for these 4 ways. MobiKin Assistant for Android Google Account USB Cable Contact SMS Call Log App Music Videos Photos Manage Your Device with Android Contacts Manager As long as you purchase an Android phone, you inevitably need to manage the contacts on your device. To simplify the management process, you can turn to the Android contacts manager software mentioned above - MobiKin Assistant for Android. In addition to exporting contacts, this program empowers you to add, delete, edit your phone contacts on PC and import contacts to your mobile phone as well. (You can click to learn how to import CSV contacts to Android>>) This enables you to complete the Android contacts management easily. And not only contacts, other file types like text messages, call logs, photos, videos, music, etc. are supported as well. With it, you are able to manage your Android phone with ease. If you are interested in it, you can click the icon below to get the tool. Write in the End That's all for how to transfer contacts from Android phone to computer. Every method has its own pros and cons so please choose the suitable one based on your actual situation. For example, for the users who wish to get contacts from Android to computer easily and quickly, MobiKin Assistant for Android can be a good option - it helps you to backup all or selected contacts with simple clicks. Related Articles: How to Transfer Text Messages from Android to Computer? How to Transfer Contacts from Samsung Phone to PC? How to I Transfer Data from Android to Computer? How to Sync Outlook Contacts with Android? The Tutorial to Print Contact List from Android When you have bought a new device, then certainly there is a need to transfer your data such as Contacts, SMS, Photos, Music, Apps, and more other documents using different methods. Your device data can also be transferred from Android smartphones to iPhone and vice versa. If you need to have a fast and easy way to transfer the data, you can try with Dr.Fone - Phone Transfer. Here we also have a list of a few different ways which can be used easily without any restrictions. Transfer Contacts from Android to Android Transferring the contacts is the most important thing, the time has come when you do not need to face the painstaking process of copying each contact with the hand. Now you can transfer the contacts easier along with cloud synchronization. It's one of the easiest ways to keep your contacts up-to-date and sync it with your Google account. Transfer the contacts and sync it on that registered account. Similarly, when you buy a new device, open your Google account on your new device and copy all the saved contacts from that account onto your new device. Transfer SMS from Android to Android You can now transfer your old SMS to the Android device easily by using this free SMS backup app, which can restore and transfer all SMS stored in XML file format, and then you can send directly to your new Android devices. Here we have used a backup app that can explain how to transfer from Android to Android easily when connected with each other and help you out to restore the SMS messages. Note that this app won't pay attention to which SMS already exists and which one is imported twice. Instead, you can use MobileTrans one-click app, which helps you out in resolving this problem. Transfer Photos from Android to Android You can use Dr.Fone - Phone Transfer, which can help you in how to transfer from Android to Android easily. You simply have to install the tool, connect your device, and share your data such as photos, movies, and other files directly from Android to the other Android devices. Try it free. Transfer Music from Android to Android We all love music and have collected the music according to our choice. Mostly we store the MP3 files that appear on your computer after you connect your smartphone. Firstly you need to download the Android File Transfer app if you're a mac user or else use Bluetooth File Transfer that saves these files on your computer, and then you can transfer to another device. Instead, you can use MobileTrans tool, which can easily resolve your problem of how to transfer everything from Android to Android with few clicks only. Transfer Apps from Android to Android There are many apps that you require to transfer from your old phone to a new device, but here we have a Helium backup tool that can explain how to transfer from Android to Android apps easily and do not require to be rooted. It can transfer the tool which can come in a free trial version and also support SD card and PC. You can automatically schedule the backup and can sync your Android devices. I hope we were able to make you understand how to transfer everything from Android to Android using third-party tools. We recommend using Dr.Fone - Phone Transfer, which works as the all-in-one tool and transfers all your data within few clicks only, including contacts, SMS, Photos, Music, Videos, Apps, etc. Why not download it have a try? If this guide helps, don't forget to share it with your friends. Start Download Start Download
